

MATERIALS TECHNOLOGY

SME 3622

Dr. Norhayati Ahmad

Dr Jasmi Hashim

Dr. Nor Akmal Fadil

Department of Materials Engineering
Faculty of Mechanical Engineering,
Universiti Teknologi Malaysia.

Topic/content

- 1. Introduction**
 - 2. Metal fracture**
 - 3. Metal creep**
 - 4. Metal fatigue**
 - 5. Corrosion**
 - 6. Polymer**
 - 7. Ceramic**
 - 8. Composite**
-

Why study ?

- ❑ *An engineer* ~ will be exposed to a design problem involving materials
 - *properties required*
 - *deterioration during service*
 - *cost*

- ❑ *Knowledge needed*
 - *materials characteristics*
 - *Structure – property relationship*
 - *Processing techniques*

By the end of this course :

Able to :

- 1) explain, analyse and differentiate the failure mechanisms (fracture, creep, fatigue, corrosion) of materials
- 2) Apply the theory of fracture mechanics in failure analysis
- 3) Relate structure, properties and processing of non metallic materials (polymer, ceramic, composite)
