## Newsflash

Joomla! 1.0 - 'Experience the Freedom!'. It has never been easier to create your own dynamic site. Manage all your content from the best CMS admin interface.

### 8th Step (Cont.)

Written by Mohd Khalid Kasmin  
Monday, 27 August 2007

Up to this point we have define the name of our project. Next we construct a class, and to follow what we already know, we name the class the same project name; latihan01.

6. 

7. 

8.

**New Java Class**

**Steps**

1. Choose File Type
2. **Name and Location**

**Name and Location**

Class Name: latihan01

Project: latihan01

Location: Source Packages

Package:

Created File: /home/mkk/prog/latihan01/src/latihan01.java

Warning: As of JDK 1.4, it is highly recommended that you do NOT place ...

< Back   Next >   Finish   Cancel   Help

9.

**NetBeans IDE 5.5.1 - latihan01**

File Edit View Navigate Source Refactor Build Run CVS Tools Window Help

Projects: latihan01

- Source Packages
  - <default package>
  - latihan01.java
- Test Packages
- Libraries
- Test Libraries

Navigator - latihan01.java

Members View

- latihan01()

Filters:

```
/*
 * latihan01.java
 * Created on August 27, 2007, 5:45 AM
 * To change this template, choose Tools | Template Manager
 * and open the template in the editor.
 */
/**
 *
 * @author mkk
 */
public class latihan01 {
    /** Creates a new instance of latihan01 */
    public latihan01() {
    }
}
```
